---

## SUMMARY

B.Sc. Computer Science graduate and full-stack developer with hands-on experience building responsive web applications using React, Next.js, Python, and Django. Skilled in designing REST APIs, integrating AI models (Gemini, YOLO) into production-style tools, and delivering end-to-end features from UI to backend. Strong foundation in data structures, algorithms, and software engineering practices, with a track record of shipping multiple full-stack and AI-powered projects independently.

## TECHNICAL SKILLS

**Languages:** Python, JavaScript, HTML5, CSS3, SQL

**Frontend:** React.js, Next.js, Tailwind CSS, Responsive UI Design

**Backend:** Django, REST API Design

**Databases:** MySQL, PostgreSQL, SQLite

**AI & Automation:** Gemini AI, OpenCV, YOLO, Playwright, BeautifulSoup, Speech Recognition

**Tools & Platforms:** Git, GitHub, VS Code, Postman, Figma, Vercel, Render

## EXPERIENCE

### Web Developer Intern — Enjay IT Solutions Ltd.

Sep 2025 – Oct 2025

- Developed and maintained responsive web applications using HTML, CSS, and JavaScript, improving cross-browser consistency and page usability.
- Debugged and optimized existing frontend code to improve load performance and user experience.
- Collaborated with the development team on real-time projects, participating in code reviews and iterative feature delivery.

### Business Operations & Data Analysis Intern (Virtual Internship)

Jan 2024 – May 2024

- Performed business analysis and operational problem-solving tasks, translating findings into structured reports.
- Interpreted operational data and partnered with stakeholders to document client requirements and processes.

### Python Programming Intern — SIIT

Apr 2023 – Jul 2023

- Built small-scale Python projects, applying core programming concepts to strengthen logical problem-solving.

## PROJECTS

### TestWise — AI-Powered Website Testing Platform

Django, Python, Playwright, BeautifulSoup, Gemini AI

- Built a platform that automates website testing using Playwright and DOM analysis to detect broken links and UI inconsistencies.
- Integrated Gemini AI to auto-generate test cases and detailed test reports, reducing manual QA effort.

### RealScan — Real-Time Object & Sound Detection System

Python, OpenCV, YOLO, Speech Recognition, Tkinter

- Developed a desktop application that detects real-world objects in real time using YOLO and OpenCV.
- Implemented voice-command recognition for accessible, hands-free interaction with the system.

### Visual Canvas — Web-Based Image Editor

HTML, CSS, JavaScript, Figma

- Built a responsive image editing web app supporting core image manipulation features from a custom Figma design.

### Portfolio Website

React, Next.js, HTML, CSS, JavaScript

- Designed and developed a personal portfolio site showcasing projects, technical skills, and experience.

## EDUCATION

B.Sc. Computer Science (CGPA: 8.8)

2023-2026

HSC (Percentage:52)

2021-2023

SSC (Percentage:73)

2011-2021
